Pre-planned attack
Behavioral indicators present (pre-attack)
Barricaded door to prevent escape
Shot through glass entry doors

INFORMATION BECOMES INTELLIGENCE WHEN EXAMINED AND DEVELOPED.

Indicators of potential violent behavior must be regarded as serious and measures taken to mitigate those behaviors from escalating into action. What are those measures? Listed below are helpful security protocols to follow:

1. Record and report threats.
2. Ensure your facility has security features to prevent an easy attack.
3. *Update your training!!*
4. Plan and prepare for an attack using roundtable discussions.

Tragedy can be circumvented through **PREPARATION**. Preparation is not defined as classroom or practical exercises **ONLY**. Structural security utilizing technology and simple entrance and exit changes may delay an attack long enough to save lives. Soft targets are **EASY** targets and require little time for the active aggressor to cause chaos and devastation. **BUY TIME** using training and structural upgrades to make the attack difficult. Have your facility accessed by
